

## New - CARBON profile!

Let us introduce a new type of profile for Paneltech sandwich panels - **CARBON**.

This is more than just a new stamping type - it's a revolution in sandwich panel design! **CARBON** profile features not only a unique appearance but also an increased facing stiffness.

### APPLICATION

- for external panel side,
- for wall panels and coldroom panels with polyisocyanurate core – PW PIR-S, PW PIR-SU and PW PIR-CH,
- wide range of RAL colours,
- for sheet metal thickness 0,5 and 0,6 mm.

# MAKE YOUR PROJECT EXCEPTIONAL

Prepare for a new dimension of possibilities in designing - reach for **CARBON** profiles and bring in a unique character to your designs!
